

SIGNODE® GripPack CB

Battery-powered cutter for steel and plastic strap

Operational flexibility

Can be used to cut both steel and plastic strapping

Improves productivity

Automates strap cutting to speed up production efforts

Simplifies operation

Lightweight with a balanced drill-style grip and one-button operation to reduce operator fatigue

Enhances safety

Built-in safety features to reduce operator exposure to flailing strap ends

Battery-powered cutter for steel and plastic strap

Signode's lightweight, battery-operated GripPack CB enhances productivity and operator safety for applications that utilize steel or plastic strapping. Unlike manual tools where operator effort is required, the GripPack CB cutter quickly and effortlessly cuts through up to 2 pieces of 1-1/4" x .044" (32 mm x 1.12 mm) steel or plastic strapping.

Part of the GripPack family

Signode's line of GripPack battery-operated tools enhance productivity and operator safety for applications that utilize steel strapping.

Features and benefits

■ Robust design

Along with an impact resistant outer nylon plastic body to protect internal components, the GripPack CB features a durable, easily replaceable cutting blade that can be used up to 50,000 cuts before replacing.

■ Maximizes productivity

Complete with the latest "fast charge" lithium ion technology, the GripPack CB battery can perform up to 240 cuts per charge and is fully recharged in just 30 minutes.

■ Simplifies operation

A single touch trigger button along with a balanced grip reduces operator fatigue.

■ Operational flexibility

GripPack CB offers two modes of operation - one for non-tensioned strap to maximize cutting speed and one for tensioned strap to help enhance operator safety. In the tensioned strap mode, the GripPack CB holds the tensioned strap in place during cutting and isolates one strap end in its serrated jaws after cutting, enabling one-handed operation that allows operators to safely position themselves away from the single rebounding strap end.

GripPack CB Technical Specifications

Part Number	800770
Strap Type	Steel or plastic strapping
Strap Width	Up to 1.25" (32 mm)
Strap Gauge	Up to 0.044" (1.12 mm)
Cycles per Charge	240+
Battery	Li-ion 18v 4Ah
Recharge Time	Full: 30 mins; 80%: 20 mins
Tool Weight	7.6 lbs (3.4 kg) including battery
Dimensions	14.25" x 3.25" x 7.25"
	362 mm x 83 mm x 184 mm
